Education

BSc. Computer Science, FAST-NUCES, Lahore | August 23 - Present | 6th Semester

Strong foundation in programming, SQL, and core computer science concepts

ICS, (Physics, Math), Punjab Group of Colleges, Lahore | August 21 - February 23

Secured strong academic performance in core subjects with 85% marks

Academic Projects

Transformer-based Text Analyzer AI, Semester Project | January 26 - April 26

- Built a text analyzer using DeBERTa, BERT, and RoBERTa to classify tone, formality, and subjectivity.
- Optimized NLP workflows by handling token limits, VRAM constraints, and efficient preprocessing.
- Delivered a reproducible pipeline with Hugging Face + Kaggle, ensuring smooth execution.

UnderstandDeen Web App, Semester Project | August 25 - December 25

- Built a web app with SQL Server backend for structured Islamic content management.
- Designed optimized schemas and queries ensuring reliable, scalable, and performance-driven data handling.
- Implemented clean, user-friendly interfaces to enhance accessibility and usability.

Hospital Management System, Semester Software Development Project | August 24 - December 24

- Developed a hospital management system applying OOP principles for modularity and scalability.
- Implemented patient, doctor, and appointment modules with clear class hierarchies.
- Ensured maintainability through encapsulation, inheritance, polymorphism, clean modular design, reusable components, and scalable architecture.

Experience and Activities

Active Member, Idyllic Youth FAST Chapter (FAST, NUCES, Lahore) | October 25 – Present

- Participated in society meetings and youth-focused discussions to stay engaged with campus initiatives.
- Volunteered in events and activities, supporting smooth execution and peer collaboration.
- Contributed suggestions and feedback fostering student involvement, community spirit, and organizational development.

Co-Founder, Director Operations, TrendGut (E-Commerce Brand) | January 24 - August 25

- Launched and managed an online store, overseeing product listings and customer engagement.
- Implemented digital marketing strategies, including SEO and ad campaigns, to drive sales growth.
- Handled day-to-day operations, ensuring smooth order fulfillment and brand visibility.

AI Remix Studio, YouTube Shorts Channel | July 24 - August 25

- Created engaging short content by generating and editing AI-based visuals with professional design tools.
- Managed complete content pipeline from ideation to publishing, showcasing digital creativity, consistency, and technical proficiency.

Full Stack Remote Intern, Digicon Valley | March 25 (2 weeks)

- Collaborated on a short-term remote project, gaining exposure to professional workflows.
- Assisted in development tasks and documentation, applying academic knowledge to practical scenarios with efficiency and precision.

Skills

AI & Machine Learning: Python, PyTorch, Hugging Face Transformers, NLP, Explainable AI (XAI)

Software Engineering: C++, JavaScript (ES6, React, Node.js), Git/GitHub Version Control

Databases & Architecture: SQL, MS SQL Server

Core Competencies: Full-Stack Development, Technical Documentation, Team Leadership
