Education

BSc. Computer Science, FAST-NUCES, Lahore | August 2023 - Present | 6th Semester

ICS, (Physics, Math), Punjab Group of Colleges, Lahore | August 2021 - February 2023 | 85%

Academic Projects

PSX Company Analyzer-AI Powered, Personal Project | Summer 2026 (2 weeks)

- Built a full-stack stock analysis tool (Python/FastAPI + React/Vite) covering 500+ PSX-listed companies with live data via web scraping.
- Scored companies on 6 customizable financial metrics and integrated Groq's Llama 3.3 70B to generate plain-English analysis in under 2 seconds.
- Built a portfolio tracker that auto-calculates hidden trading costs — broker commission, SST, CDC, and CGT — using MS SQL Server and Supabase PostgreSQL.

Transformer-based Text Analyzer AI, Semester Project | January 2026 - April 2026

- Built a text analyzer using DeBERTa, BERT, and RoBERTa to classify tone, formality, and subjectivity, handling token limits and VRAM constraints.
- Deployed a reproducible pipeline on Hugging Face + Kaggle for others to run without setup issues.

UnderstandDeen Web App, Semester Project | August 2025 - December 2025

- Built a web app with an SQL Server backend, using normalized schemas and optimized queries for structured Islamic content management.
- Designed a clean, accessible interface for non-technical users to browse and manage content.

Hospital Management System, Semester Project | August 2024 - December 2024

- Built a hospital management system in C++ with OOP principles, structuring Patient, Doctor, and Appointment classes using inheritance to eliminate duplicated logic.
- Applied encapsulation and polymorphism so new modules could be added without touching existing code.

Experience and Activities

Full Stack Development Intern, Progree | June 2026 (1 month)

- Built a responsive portfolio site using semantic HTML5 and CSS Grid/Flexbox with fluid layouts and an interactive mobile nav menu.
- Built a full-stack CRUD dashboard connecting a React frontend to a Node.js/Express API with async fetch calls against a local database.
- Built a secure e-commerce module with JWT auth, hashed credentials, persistent cart state, and Stripe checkout with backend inventory updates.

Active Member, Idyllic Youth FAST Chapter (FAST, NUCES, Lahore) | October 2025 – Present

- Volunteered in society events and youth-focused discussions, contributing feedback that supported student engagement initiatives.

AI Remix Studio, YouTube Shorts Channel | July 2024 - August 2025

- Produced 20+ short-form videos using CapCut for AI-generated visuals, reaching 10K+ combined views.
- Managed the full content pipeline from ideation to publishing, maintaining a consistent release schedule.

Skills

AI & Machine Learning: Python, PyTorch, Hugging Face Transformers, NLP, Groq API

Software Engineering: C++, JavaScript (ES6, React, Node.js), FastAPI, Git/GitHub Version Control

Databases & Architecture: SQL, MS SQL Server, PostgreSQL (Supabase)

Core Competencies: Full-Stack Development, Technical Documentation, REST APIs, JWT Authentication
